The Offer is non-renounceable. Accordingly, a Shareholder may not sell or transfer all or part of their Entitlement.

4.6 Underwriting

The Offer is fully underwritten by the Underwriter. Refer to Section 8.5 of this Prospectus for details of the terms of the underwriting.

4.7 Details of substantial holders

Based on publicly available information as at 17 October 2014, those persons which (together with their associates) have a relevant interest in 5% or more of the Shares on issue are set out below:

Shareholder	Shares	%
PT Saratoga Investama Sedaya Tbk	148,821,385	14.87%
Provident Minerals Pte Ltd	148,821,384	14.87%
National Nominees Limited	117,640,881	11.75%
HSBC Custody Nominees (Australia) Pty Ltd	102,820,841	10.27%

In the event all Entitlements are accepted there will be no change to the substantial holders on completion of the Offer.

4.8 Effect on control of the Company

The Company has entered into an underwriting agreement with the Underwriter under which the Underwriter has agreed to fully underwrite the Offer. A summary of the material terms of the Underwriting Agreement is set out in Section 8.5 of this Prospectus.

The Directors of the Company consider, having regard to all available options, that entering into the Underwriting Agreement with the Underwriter provides the Company with the highest degree of certainty in the time available that the Offer will be successful.

The Underwriter presently is a Shareholder of the Company and the extent to which Shares are issued pursuant to the underwriting will increase the Underwriters' voting power in the Company.

The Underwriter is a related party of the Company for the purpose of the Corporations Act by virtue of the fact that it is controlled by Gavin Caudle, a Director. Notwithstanding this relationship between the Company and the Underwriter, the Board (other than Gavin Caudle) considered prior Shareholder approval to the entry into the Underwriting Agreement (which is deemed under the Corporations Act to be the giving of a financial benefit to the Underwriter) was not required on the basis that the terms of the agreement are considered to be 'arm's length'.

The Underwriter's present relevant interest and changes under several scenarios are set out in the table below and are based on the assumption that the Underwriter takes up its full entitlement of 18,602,673 Shares under each scenario.

Event	Shares held by Underwriter	Voting power of Underwriter
Date of Prospectus	148,821,384	14.87%
Completion of Entitlement Issue		
• Fully subscribed	167,424,058	14.87%
• 75% subscribed	194,048,431	17.23%
• 50% subscribed	220,672,804	19.6%
• 12.50% subscribed (being the Underwriter's Entitlement).	273,921,551	24.33%

Note: For each scenario, the following assumptions have been made:

1. The Company's current capital structure (as outlined in Section 5.4 of this Prospectus) does not change; and
2. The Underwriter takes up its full Entitlement.

The number of Shares held by the Underwriter and its voting power in the table above show the potential effect of the underwriting of the Offer. However, it is unlikely that no Shareholders, other than the Underwriter, will take up Entitlements under the Offer. The underwriting obligation and therefore voting power of the Underwriter will reduce by a corresponding amount for the amount of Entitlements under the Offer taken up by the other Shareholders.

Prior to entering the Underwriting Agreement, the company considered alternative underwriting options to mitigate the potential control effects. However in the current commercial environment the most suitable underwriting option in the Board's opinion that was available to it was that outlined above.

In order to mitigate the potential control effects of the Underwriting, the Company has included alongside the Offer a Shortfall Offer pursuant to section **Error! Reference source not found.**

4.9 Potential Dilution

Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 11.1% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus). Examples of how the dilution may impact Shareholders is set out in the table below:

Holder	Holding as at Record date	% at Record Date	Entitlements under the Offer	Holdings if Offer not taken Up	% post Offer
Shareholder 1	100,000,000	9.99%	12,500,000	100,000,000	8.88%
Shareholder 2	50,000,000	5.00%	6,250,000	50,000,000	4.44%
Shareholder 3	15,000,000	1.50%	1,875,000	15,000,000	1.33%
Shareholder 4	4,000,000	0.40%	500,000	4,000,000	0.36%
Shareholder 5	500,000	0.05%	62,500	500,000	0.04%
Total Shares on issue		1,000,801,331			1,125,901,498

Notes:

1. Fractional entitlements have been rounded up to the nearest whole number.
2. Assumes no further Shares or Options are issued and no Options currently on issue are exercised.
3. The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted are placed under the Shortfall Offer.

4.10 Future intentions of the Underwriter

The Underwriter has indicated that the intentions disclosed in this section are based on the facts and information regarding the Company and the general business environment which are known to it as at the date of this Prospectus. Any future decisions will, of course, be reached by the Underwriter based on all material information and circumstances at the relevant time. Accordingly, if circumstances change or new information becomes available in the future, the intentions of the Underwriter could change.

The Underwriter is supportive of the Company's current direction.

The Underwriter will make decisions on their course of action in light of material facts and circumstances at the relevant times and after it receives appropriate legal and financial advice on such matters, where required, including in relation to any requirement for Shareholder approvals.

The statements reflect current intentions only as at the date hereof which may change as new information becomes available or circumstances change or with the passage of time.

4.11 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer.

The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.012 being the price at which Shares have been offered under the Offer.

The Directors and the Underwriter reserve the right to issue Shortfall Shares at the discretion of the Underwriter in conjunction with the Directors.

4.12 ASX listing

Application for Official Quotation of the Shares offered pursuant to this Prospectus will be made in accordance with the timetable set out at the commencement of this Prospectus. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of 3 months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all application monies for the Shares within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Shares now offered for subscription.

4.13 Issue of Shares

Shares issued pursuant to the Offer will be issued in accordance with the ASX Listing Rules and timetable set out at the commencement of this Prospectus.

Shares issued pursuant to the Shortfall Offer will be issued on a progressive basis. Where the number of Shares issued is less than the number applied for, or where no issue is made surplus application monies will be refunded without any interest to the Applicant as soon as practicable after the closing date of the Shortfall Offer.

Pending the issue of the Shares or payment of refunds pursuant to this Prospectus, all application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for Shares issued under the Offer will be mailed in accordance with the ASX Listing Rules and timetable set out at the commencement of this Prospectus and for Shortfall Shares issued under the Shortfall Offer as soon as practicable after their issue.

4.14 Overseas shareholders

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Shares these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Generally, Shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

6.7 Future increase in capital

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may at any time and from time to time issue Shares as they shall, in their absolute discretion, determine.

6.8 Variation of rights

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to shares.

If at any time the share capital is divided into different classes of Shares, the rights attached to any class (unless otherwise provided by the terms of issue of the Shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the Shares of that class.

6.9 Alteration of constitution

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

7. RISK FACTORS

7.1 Introduction

The Shares offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding whether to apply for Shares pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Shares.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

7.2 Company specific

(a) Potential for significant dilution

Upon implementation of the Offer, assuming all Entitlements are accepted and no Options are exercised prior to the Record Date the number of Shares in the Company will increase from 1,000,801,331 currently on issue to 1,125,901,498. This means that each Share will represent a significantly lower proportion of the ownership of the Company.

It is not possible to predict what the value of the Company or a Share will be following the completion of the Offer being implemented and the Directors do not make any representation as to such matters.

The last trading price of Shares on ASX prior to the prospectus being lodged of \$0.013 is not a reliable indicator as to the potential trading price of Shares after implementation of the Offer.

(b) Feasibility Study

The Company recently completed and published a Feasibility Study of the Sihayo Pungkut Gold Project. There is no assurance that the cost estimates and underlying assumptions in the Feasibility Study will be realised in practice, which may materially and adversely affect the company's viability.

In the event the cost estimates and the underlying assumptions are unachievable in practice, the Company may be required to undertake further work, including, amongst other things, attempting to increase the amount of gold in the known resource by expanding the boundaries of the ore body as currently defined, investigate additional opportunities to improve metallurgical recoveries and investigate a more cost effective power supply. This would require the Company to expend significantly more funds than are currently available to the Company. There is no guarantee this extra work would produce a financially viable project, which would materially affect the viability of the Company.

Alternatively, the Company may wish to continue exploration across the Contract for Work which would require additional funds.

(c) **Resource Estimate**

Resource estimates are expressions of judgment based on knowledge, experience and industry practice. Estimates, which were valid when made, may change significantly when new information becomes available. In addition, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. Should the Company encounter mineralisation or formations different from those predicted by past sampling and drilling, resource estimates may have to be adjusted and mining plans may have to be altered in a way which could have either a positive or negative effect on the Company's operations.

(d) **Lack of Executive Management**

The Company's management currently consists of two non-executive directors, the Managing Director and one executive director (who is also the Company's Chief Financial Officer). The Board is aware of the need to have sufficient management to properly supervise the development of the Sihayo Pungkut Gold Project. The Board will continually monitor the management roles in the Company.

As the Company's Sihayo Pungkut Gold Project progresses it will require an increased level of involvement by the Board and senior management. The Company will look to appoint additional management and/or consultants when and where appropriate to ensure proper management of the Company's major projects.

However, there is a risk that the Company may not be able to secure personnel with the relevant experience at the appropriate time which may impact on the Company's ability to develop its Sihayo Pungkut Gold Project in its preferred timetable. The responsibility for overseeing the day-to-day operations and the strategic management of the Company depends substantially on two key management personnel and the Board, respectively. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these Directors or managers cease their employment.

(e) **Sovereign Risk**

The Company's Sihayo Pungkut Gold Project is located in Indonesia. As such its operations are subject to regulation by Central Government and local government bodies in relation to mining operations, environment, community relations and manpower.

Possible sovereign risks associated with operating in Indonesia include, without limitation, changes in the terms of mining legislation, changes to royalty arrangements, changes to taxation rates and concessions and changes in the ability to enforce legal rights. Any of these factors may, in the future, adversely affect the financial performance of the Company and the market price of its Shares.

No assurance can be given regarding future stability in Indonesia or any other country in which the Company may, in the future, have an interest.

(f) **Gold**

Changes in the market price of gold, which in the past have fluctuated widely, will affect the profitability of the Company's projected operations and its financial condition. The viability of the Company's Sihayo Pungkut Gold Project also depends on the future market price of gold. The price of gold is set in the world

market and is affected by numerous industry factors beyond the Company's control including the demand for precious metals, expectations with respect to the rate of inflation, interest rates, currency exchange rates, demand for jewellery and industrial products containing gold, gold production levels, inventories, cost of substitutes, changes in global or regional investment or consumption patterns, and sales by central banks, other holders and speculators, and global and regional political and economic factors.

A decline in the market price of gold below the Company's projected production costs for a sustained period may have a material adverse impact on the viability of the Company's Sihayo Pungkut Gold Project. Such a decline also could have a material adverse impact on the ability of the Company to finance the development of the existing project. A decline in the market price of gold may also require the Company to write-down the carrying value of assets which may have a material adverse effect on the value of the Company's securities

(g) **Gold - Operating and Development Risks**

The Company's ability to achieve production, development, operating cost and capital expenditure estimates on a timely basis cannot be assured. The business of gold mining involves many risks and may be impacted by factors including ore tonnes, yield, input prices (some of which are unpredictable and outside the control of the Company), overall availability of free cash to fund continuing development activities, labour force disruptions, cost overruns, changes in the regulatory environment and other unforeseen contingencies. Other risks also exist such as environmental hazards (including discharge of pollutants or hazardous chemicals), industrial accidents and occupational and health hazards. Such occurrences could result in damage to, or destruction of, production facilities, personal injury or death, environmental damage, delays in mining, increased production costs and other monetary losses and possible legal liability to the owner or operator of the mine. The Company may become subject to liability for pollution or other hazards against which it has not insured or cannot insure, including those in respect of past mining activities for which it was not responsible.

In addition the Company's profitability could be adversely affected if for any reason its production and processing of gold or mine development is unexpectedly interrupted or slowed. Examples of events which could have such an impact include unscheduled plant shutdowns or other processing problems, mechanical failures, the unavailability of materials and equipment, pit slope failures, unusual or unexpected rock formations, poor or unexpected geological or metallurgical conditions, poor or inadequate ventilation, failure of mine communication systems, poor water condition, interruptions to gas and electricity supplies, human error and adverse weather conditions.

The risks outlined above also mean that there can be no assurances as to the future development of a mining operation in relation to any of the Company's projects described in this Prospectus or which the Company may acquire in the future

7.3 Industry specific

(a) **Exploration**

The mineral tenements of the Company are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings.

There can be no assurance that exploration of these tenements, or any other tenements that may be acquired in the future, will result in the discovery of an

economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, native title process, changing government regulations and many other factors beyond the control of the Company.

The success of the Company will also depend upon the Company having access to sufficient development capital, being able to maintain title to its Tenements and obtaining all required approvals for its activities. In the event that exploration programmes prove to be unsuccessful this could lead to a diminution in the value of the tenements, a reduction in the case reserves of the Company and possible relinquishment of the tenements.

The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

(b) Operations

The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its tenement interests. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

(c) Commodity price volatility and exchange rate risks

If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macro-economic factors.

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Indonesian and Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar, the Indonesian Rupiah and the Australian Dollar as determined in international markets.

(d) **Changes in Indonesian law**

Changes to the mining law or other government legislation and regulations in Indonesia, or to the division of regulatory powers between the Central Government in Jakarta and local and provisional bodies, may materially impact on the ability of the Company to operate in Indonesia and on the ultimate profitability and financial performance of the Company. The Company's capacity to explore and mine, in particular the Company's ability to explore and mine any reserves, may be affected by changes in government policy, which are beyond the control of the Company. In the event that an economic resource is identified in the Sihayo Pungkut Gold Project there can be no assurance that all or any of the relevant approvals and permits necessary to conduct mining operations will be granted.

7.4 General risks

(a) **Economic**

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

(b) **Market conditions**

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(c) **Potential Acquisitions**

As part of its business strategy, the Company may make acquisitions of or significant investments in companies, products, technologies or resource projects. Any such future transaction would be accompanied by the risks commonly encountered in making acquisitions of companies, products, technologies or resource projects.

(d) **Additional requirements for capital**

The Company may require further financing in addition to amounts raised under the Offer in order to progress the construction phase of the Sihayo Pungkut Gold

Project. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be unable to progress the construction of a mining operation at the Sihayo Pungkut Gold Project. There is no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

(e) **Dividends**

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.

(f) **Taxation**

The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares under this Prospectus.

(g) **Reliance on key personnel**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

7.5 Speculative investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Shares offered under this Prospectus.

Therefore, the Shares to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Shares.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Shares pursuant to this Prospectus.

Pursuant to Class Order 00/44, the ASIC has exempted compliance with certain provisions of the Corporations Act to allow distribution of an electronic prospectus and electronic application form on the basis of a paper prospectus lodged with the ASIC, and the publication of notices referring to an electronic prospectus or electronic application form, subject to compliance with certain conditions.

If you have received this Prospectus as an electronic Prospectus, please ensure that you have received the entire Prospectus accompanied by the Application Forms. If you have not, please phone the Company on +61 427 401198 and the Company will send you, for free, either a hard copy or a further electronic copy of the Prospectus, or both. Alternatively, you may obtain a copy of this Prospectus from the Company's website at www.sihayogold.com.

8.12 Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

8.13 Clearing House Electronic Sub-Register System (CHES) and Issuer Sponsorship

The Company will not be issuing share certificates. The Company is a participant in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company. Because the sub-registers are electronic, ownership of securities can be transferred without having to rely upon paper documentation.

Electronic registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with a statement (similar to a bank account statement) that sets out the number of Shares issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

8.14 Privacy Act

If you complete an application for Shares, you will be providing personal information to the Company (directly or by the Company's share registry). The Company collects, holds and will use that information to assess your application, service your needs as a holder of equity securities in the Company, facilitate distribution payments and corporate communications to you as a Shareholder and carry out administration.

The information may also be used from time to time and disclosed to persons inspecting the register, bidders for your securities in the context of takeovers, regulatory bodies, including the Australian Taxation Office, authorised securities brokers, print service providers, mail houses and the Company's share registry.

You can access, correct and update the personal information that we hold about you. Please contact the Company or its share registry if you wish to do so at the relevant contact numbers set out in this Prospectus.

Collection, maintenance and disclosure of certain personal information is governed by legislation including the Privacy Act 1988 (Cth) (as amended), the Corporations Act and certain rules such as the ASX Settlement Operating Rules.
